

What is the Geospatial Information Center?

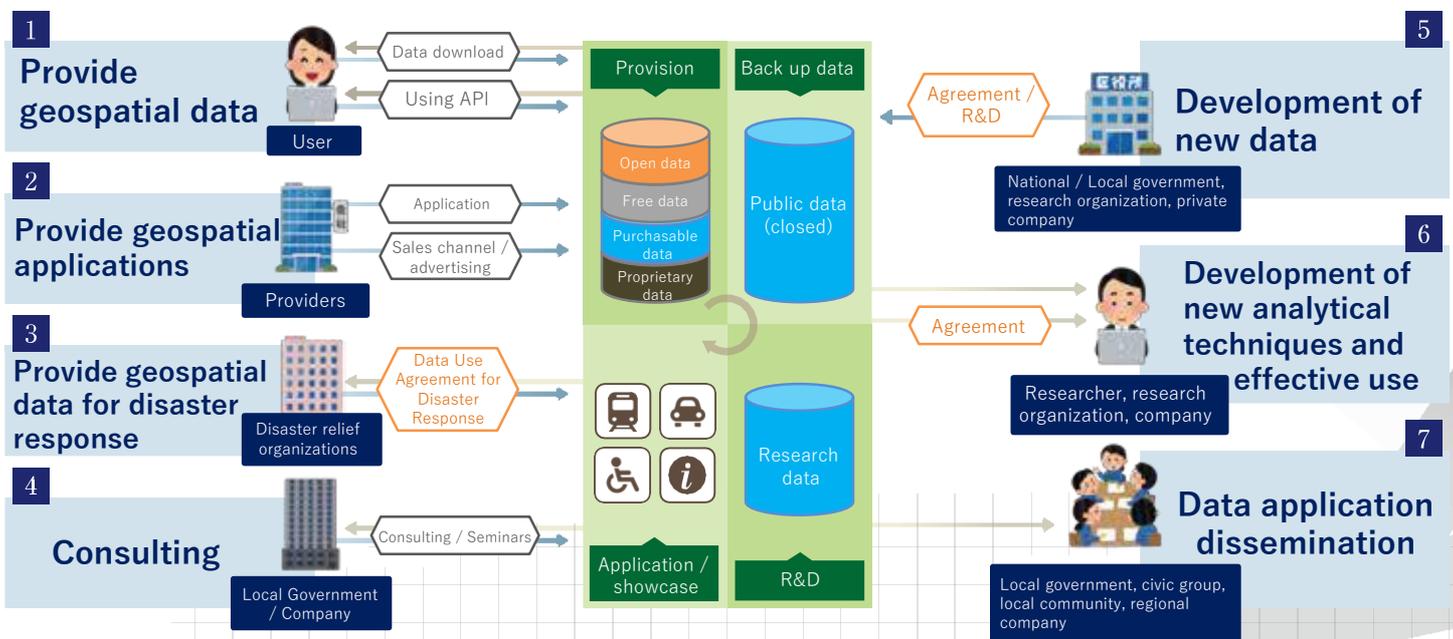

Geospatial Information Center (GsC) is an organization that supports the effective use and distribution of specialized Geospatial information compiled and maintained by various groups for diverse purposes. We provide a one-stop search system for geospatial data and related information which users require. We also develop projects for creative innovation R&D, data curation and other purposes.

Social Aims of the Geospatial Information Center

Distribution support

Services Overview

Major Data Examples

Purchasable company data is available on the GsC

Spot traffic volume data

AIGID

Walking track record data

Pioneer

Congestion degree data

ZENRIN DataCom

Real-time disaster information

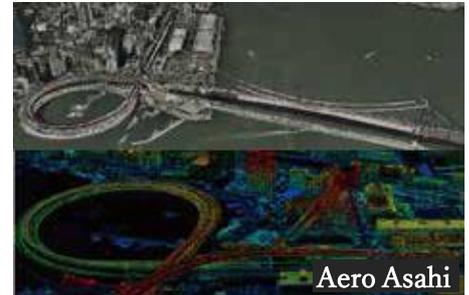

Providing disaster emergency photographic data (Free Provision)
<https://www.geospatial.jp/disaster-info/>

Red Relief Image Map digital data

Asia Air Survey

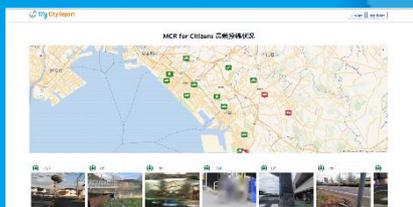

good-3D DSM point group data

Aero Asahi

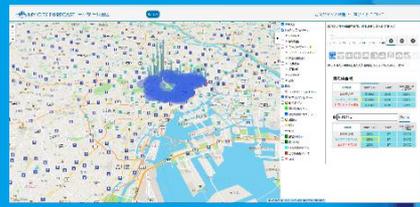

Geospatial social business models

My City Report

Civic collaboration reporting system for the public <https://www.mycityreport.jp/>

My City Forecast

Future population forecast simulation in residential area environments <https://mycityforecast.net/>

Digital City Service

Digital twins (3D urban city model) <https://www.digitalsmartcity.jp/>

My City Construction

Online Electronic Delivery System for Public projects <https://mycityconstruction.jp/>

Cooperation with other sectors

Comprehensive agreement :

MLIT City Bureau,
The University of Tokyo

Cooperate agreement in disaster scenarios:

Information use

PASCO CORPORATION/ AERO ASAHI CORPORATION/ AGOOP Corp. / KOKUSAI KOGYO CO.,LTD./ NAVITIME JAPAN Co., Ltd./ ZENRIN Data Com CO., LTD. / and others

Information provision

NIED/ IT DIRT/CRISIS mappers
JAPAN/ OSMFJ/OSGeo
Foundation/Osaka City University
CERD/
GENSAI (Disaster risk reduction) info

Association for Promotion of Infrastructure Geospatial Information Distribution <AIGID>
